# Get the IT Strategy You Need with KME's IT Experts

Before we dive into the benefits of hiring a team of IT experts, let's begin by defining the role and what they can do for your business.

A consultant's primary role is to assist organizations with specific areas of their business. Consultants take on a variety of roles and responsibilities – from acting as an educator and knowledge base to providing objective advice and being a catalyst for change.

In the tech world, an IT consultant is someone who focuses on advising organizations on how to best use technology in achieving their business objectives. Businesses rely on IT consultants to aid in IT purchasing decisions as well as to estimate, deploy, and manage IT systems on their behalf. That way, you can stay focused on the core of your business without technology decisions and issues weighing down on you.

“...more than 35% of survey respondents say they already measure the value of innovation in their outsourced partnerships.”

At [KME Systems](#), our team of IT consultants go beyond just consulting. We provide businesses with the much-needed peace of mind that their IT is in capable hands. We have the service, skills, and knowledge that you need to make the most strategic IT investments. That way, you can rest easy and focus on the aspects of your business that you know while we handle all things tech.

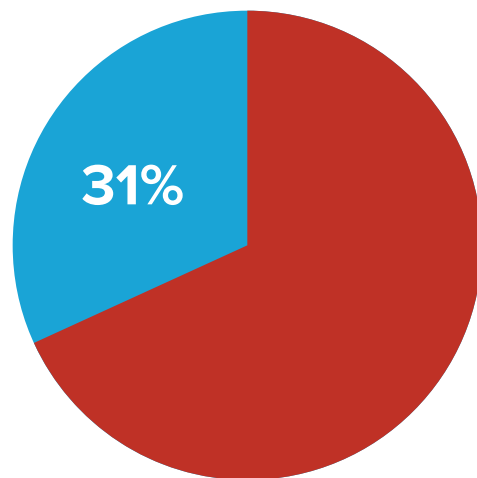

## Work Empowered with the Help of Our IT Experts

As the CEO of your company, it's important to realize the impact that information technology has had on your work processes and overall business operations. One way for you to stay on top of rapid technological changes and to maintain a competitive edge over your rivals is by hiring outsourced IT experts and utilize their consulting services.

According to a 2016 Global Outsourcing Survey by [Deloitte](#), 31% of IT services have been outsourced, and businesses will continue to do so for the years to come.

On top of that, more than 35% of survey respondents say they already measure the value of innovation in their outsourced partnerships. With an increasing emphasis for service providers to deliver value beyond cost savings, outsourced IT consultants must create improvement opportunities for their clients in order to live up to today's demands.

**31% of IT services have been outsourced, and businesses will continue to do so for the years to come.**

**Here are some advantages of having a team of IT experts on your side:**

## **IT Guidance**

You're not expected to be a subject-matter expert in regards to your organization's IT. That's our job! We guide you in making the best IT decisions for your specific goals and desired workflows. While running a company with 10 employees or 1,000 employees, there's no question that you need time to focus on the core business and services you provide to customers every day. Instead of maintaining IT issues on your own, you can rely on our team of IT experts.

“By helping you leverage the latest advances in technology, an IT consultant helps your business become more productive without adding on more work”

## **Full-Time Support without Full-Time Costs**

Access highly specialized talent and third-party objectivity with the help of IT professionals. Rather than keeping full-time employees and paying salaries, benefits, and training – you can simply access specialized skills on-demand with your team of IT experts. When your staff knows they can rely on the experts at KME Systems to address a range of IT problems and provide objective IT advice, you'll be able to reduce downtime and work with fewer distractions.

## **A Smoother Workflow for a Smoother Work Life**

By helping you leverage the latest advances in technology, our IT experts helps your business become more productive without adding on more work. Rather than wasting time and valuable resources testing out new tech solutions or apps that may not be best suited for your organization, you can simply depend on your IT team to do the research for you and help you make the most strategic IT purchasing decisions on your behalf. That way, you can enjoy a smoother workflow while also improving productivity.

## **Let's Make Technology Work for YOU**

What does it mean to make technology work for you? It means using technology to free up constraints and work smarter without having to pile on more work. Let's work together to find out how your business can benefit from our IT expertise.
